

Toyota Forklift

Toyota Forklift Training Oshawa - Since 1992, Toyota Material Handling inc., U.S.A., often known as TMHU, has been the best selling lift truck dealer in the U.S. This business has been based out of Irvine, California for well over 40 years, providing a complete line of quality lift trucks. With a first-rate reputation of stability and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the keystone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are built here.

All Toyota machinery and components manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to continuous progress, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, links Toyota's achievement to its robust commitment to fabricating the best quality lift trucks while delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is among the magazines impressive world's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company values towards environmental conservancy within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability cannot be matched by other companies and unquestionably no other materials handling manufacturer can thus far rival Toyota. Environmental responsibility is a key feature of corporate decision making at Toyota and they are proud to be the first and only maker to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more involved 2010 emission standards. The finished creation is a lift truck that creates 70% less smog forming emissions than the current Federal standards tolerate.

Moreover in 2006, Toyota developed a partnership with the Arbor Day Foundation, furthering their dedication to the environment. More than 57,000 trees have been planted in community parks and national forests damaged by natural reasons such as fires, as a result of this partnership. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood customers to help sustain communities all over the U.S.

Industry-Leading Safety

Toyota's lift trucks provide improved output, visibility, ergonomics and durability, and most significantly, the industry's leading safety technology. The company's System of Active Stability, also known as "SAS", helps limit the chance of accidents and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability senses several aspects that might lead to lateral instability and likely lateral overturn. When any of those conditions are detected, SAS instantaneously engages the Swing Lock Cylinder to steady the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding durability.

SAS was originally launched to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS have been integrated into most of Toyota's internal combustion machines. It is standard gear on the latest 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with obligatory operator training, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there have been an overall 35.5% fall in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training program to help clients meet OSHA standard 1910.178. Training programs, video tutorials and various resources, covering a broad scope of topics-from individual safety, to OSHA rules, to surface and cargo conditions, are offered through the supplier network.

Toyota's Commitment to The U.S.A.

Since the sale of its first lift vehicle in the U.S. to the construction of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a unbroken existence in the U.S. This reality is demonstrated by the statistic that

99% of Toyota lift trucks bought in America today are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of land. Facilities include a National Customer Center, as well as production operations and supply centers for equipment and service components, with the whole commitment exceeding \$113 million dollars.

The new NCC was built to serve TMHU clients and sellers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a instruction center.

First in Client Satisfaction and Service

The NCC embodies Toyota's dedication to offering top-notch client service. TMHU's 68 certified Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all over the U.S, supply the most wide-ranging and inclusive client service and support in the industry. The company's new and Licensed Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to guarantee total client satisfaction.
