JLG Telehandler

JLG Telehandler Training Oshawa - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Freshly retired, after spending several years working with his brother to manufacture their crane company into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road trip.

While on their trip, John spent time conversing with former business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered an infinite marketplace for a product that could swiftly and safely lift individuals in the air to accomplish upkeep and other building functions.

After their return from holiday, John set up a partnership with two of his friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into current models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make sure consumers are capable of being more efficient and perform in the workplace within a safer environment.
