Oshawa Order Picker License

Oshawa Order Picker License - Order picking is likewise called order preparation operation. This is amongst the key processes in a warehouse and consists of people referred to as order pickers, taking and collecting articles in a certain quantity prior to shipment in order to fulfill client orders. Order picking is an easy warehousing method. The effectiveness in which this particular task is done could be directly related to a supply chain's productivity. Thus, order picking is one of the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are particular types of order picking which comprise: wave picking method, pick to box method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the things from his or her station. The box then moves to other picking stations until the customer order is finish. In this particular technique, there is no movement of the order picker personnel. In the wave picking method, the order pickers move around so as to gather the needed things for several orders. The piece picking or picker to part method is similar where the order picker or pickers move to be able to gather the stuff needed but for one order only.

In the sorting systems method, there is no movement of the order picking personnel. Instead, the stuff are delivered to him or her by means of an automated system like a conveyor system or an automatic storage. In the zone picking method, every order picker is assigned to one specific area. They are responsible for only realizing order picking within this specified area.
