

## Oshawa Counterbalance Forklift License

Oshawa Counterbalance Forklift License - When operated by totally trained operators, forklifts can become a major advantage for companies and firms. We can provide your personnel a comprehensive training program that consists of all factors of operating a powered lift machinery. Counterbalance forklift training provides operators of forklifts with the practical skill and understanding considered necessary so as to safely and efficiently operate forklifts. The particular program provides a combination of classroom theory, hands-on training and participant observation within a warehouse-type atmosphere. Training could be on site and/or customized.

The course covers the fundamentals of powered lift trucks, like for example regulations and rules, components, load centres and factors affecting stability. General operating procedures are taught, like startup, circle check, forward/reverse on level ground, shutdown, and operating around other individuals. Load handling subject matters include load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. Individuals participating will learn operational maintenance procedures, like for example recharging and refueling. Safety issues within the workplace will be discussed. Participants would learn about the environmental conditions affecting the performance of the lift truck and be able to recognize potential hazards. Advanced training on propane handling could be included.

Employers and their employees may face penalties if they do not operate based on industry and national standards. Workers operating a counterbalance forklift will have to be knowledgeable about the safe operation rules of their forklift. Training is suggested for any individual applying for a job which needs forklift operation.

Within our personalized small classes, we provide both hands-on training and in-class theory. The options for personalized training would include refresher or entry level courses.
